## Top Skills

Data science  
Statistical Modeling  
Data Mining

## Certifications

Database Management Systems  
Intro to SQL for Data Science  
Joining Data in SQL  
Python Data Science Toolbox (Part 2)  
Python Data Science Toolbox (Part 1)

# Anmol Bhargava

Senior Data Scientist Coinbase, New York  
New York City Metropolitan Area

## Summary

For the past 9 years, I have worked in similar capacity at GMR GROUP and ITC LIMITED where my responsibilities included predictive and statistical analysis using machine learning, data mining, ETL design and development, text analytics, optimization, database design and development and development of business dashboards on the data related to passengers and guests .

At ITC limited (leading chain of hotel ) in India, I designed, developed and delivered a completely automated analytics-based product for intelligently generating weekly room rent based on guest booking pattern which combined ETL for data mining and data processing, room rent prediction using combination of regression, decision trees, profit optimization with dynamic programming based greedy optimization and formulated an interactive dashboard on tableau to generate and access economic value of generated room rent . The system was developed using combination of R, Python, SQL, Tableau and Excel working in tandem to make product actionable. I also worked on a number of energy optimization measures and optimized airline operation using predictive and prescriptive modelling techniques.

I have excellent analytical, communication, and problem-solving abilities. I am very effective working cross functionally and achieving alignment between groups with differing points of view. I forge lasting relationships, engage stakeholders, and effectively institute change by bringing people together. I am attuned to my customers, delivering excellent services and education on products.

---

## Experience

Coinbase  
Senior Data Scientist  
November 2021 - Present (4 years 7 months)  
New York City Metropolitan Area

Designed ATS tool to filter candidates based on their likelihood to succeed in a role by extracting features from candidate's resume and formulating probabilistic model using NLP, regex, and pdf parser libraries

- Created and fine-tuned dashboards for talent acquisition, L&D and Compliance team to assist in the recruitment process
- Built People Data Lake and designed architectural layout (data vault SCD type 2 design) by extracting data from APIs/BI Connector using Airflow to optimize data flow and quality
- Formulated attrition and forecasting models to predict the future attrition across the company/ teams
- Created and enhanced existing data pipelines in airflow to automate the data extraction, manipulation, processing, and data loading into databases
- Prepared and presented results, reports, both oral and written, to client and client success managers, concerning processes, models, evaluation, and impact (ROI and CPA)
- Performed statistical and regression analysis of the company-wide survey results to measure the correlation between questionnaire responses, implemented hypothesis testing, and did exploratory data analysis to report insight

## ERGO

### Senior Data Intelligence Analyst

March 2020 - October 2021 (1 year 8 months)

New York, United States

Performed extraction of data sets from multiple platforms and performed hygiene, validation and quality control

steps that improved data quality by 20%

- Implemented, developed, and maintained marketing metrics, reports, analyses, dashboards to ensure accurate
- Timely delivery of ad-hoc monthly reports along with competitive analysis that improved customer retention by 10%
- Designed and developed scalable ML/AI solutions by deriving statistically significant features from rich data sources
- Trained, evaluated, and deployed ML models to solve diverse business challenges that improved sales by 15%

## Principal Financial Group

### Student Data Analyst

August 2019 - December 2019 (5 months)

College Park, Maryland

Guided a team of 4 to extract 2 and 3 factor regime datasets provided by Principal global related to financial markets with 15 million+ records from PostgreSQL, preprocessing and storing data on an EC2 instance

- Performed visualizations, feature engineering and developed ML algorithms to predict market volatility with 84% accuracy and identified important features which helped clients optimize their stock portfolio leading to a 20% increase in profitability

## GMR Group

Senior Engineer

November 2015 - August 2018 (2 years 10 months)

Delhi, India

Led a team to scrape, preprocess and analyze travel data from varied online sources to identify seasonality behavior in

passengers' travel leading to 10% increase in profitability

- Built relationships with key business partners, analyzed source data and systems, and provided feedback on detailed data

analysis to guide data-driven, people-focused decision making helping to improve business portfolio value by 12%

- Scheduled all ETL processes, executed OLAP queries and generated data pipelines to automate the data processing

- Collaborated with Business Intelligence to publish a network-wide HR dashboard that served as a single point of entry for easy visual access to all workforce data by different segments and use cases

- Acted as a team supervisor, mentor, and guide, bringing new employees up to speed with the aviation industry's policies

## ITC Hotels

Junior Engineer

July 2012 - October 2015 (3 years 4 months)

Gurugram, Haryana, India

Directed a team of 5 towards analyzing historical consumer behavior, information about competitors to build market datatrends

- Spearheaded a team of 5 to generate data, perform visualizations and compile quantitative reports for quarterly sales

KPI monitoring like RevPAR, ADR, GOPPAR helping to improve profitability by 11%

- Analyzed complex data related to guest bookings and performed exploratory data analysis to understand booking pattern
- Developed SQL scripts, tables, views, stored procedures, functions, triggers, constraints, and indexes to optimize SQLqueries
- Responsible for moving data into databases from various sources, do data merging and transformations as needed

---

## Education

University of Maryland

Master of Science - MS, Business Analytics · (2018 - 2019)
